

ALEXANDER TOBIN

Junior Application Developer | React · Python · PostgreSQL · REST APIs · Git

(757) 289-1204 ♦ atobin@alum.utk.edu ♦ Virginia Beach, VA

CORE SKILLS

React (React 18, hooks, Tailwind CSS, component architecture)

Python (scripting, automation, data processing, FastAPI-style backends)

PostgreSQL / Supabase — relational database design, SQL queries, REST APIs

REST API integration and data pipeline development

Git / GitHub — version control, CI/CD pipelines

JavaScript / TypeScript (basic to intermediate)

EDUCATION

Bachelor of Arts — Pre Law/Legal Studies, Business Concentration
University of Tennessee, Knoxville, TN — Aug 2019

CERTIFICATIONS

- ♦ Google Analytics Certification
- ♦ DP-203: Azure Data Engineering (In progress)
- ♦ AWS Certified DevOps Engineer (In progress)

PROFESSIONAL SUMMARY

Full-stack application developer with hands-on production experience building internal business applications, integrations, and workflow automations using React, Python, PostgreSQL, and REST APIs.. Genuinely curious about how systems connect to real business operations — I have built software used by real users, integrated live APIs, and designed solutions by starting with a deep understanding of the problem rather than a technology assumption..

PROFESSIONAL EXPERIENCE

Freelance Application Developer

Jan 2026 – Present

[callcathai.online](#) · [primelayertrades.com](#) · [hereraspreadsheets.com](#)

- ♦ Built AdvisoryCloud 3.0 — production SaaS (React 18, Supabase/PostgreSQL, Tailwind CSS, PWA, Vercel) connecting founders with advisors; real-time messaging, role-based access, 15+ database tables with RLS and Row Level Security policies; built from requirements to live production in 7 days.
- ♦ Built Container Tracker — internal logistics tracking application (React, Supabase, Vercel) with live shipping API integration, a 6-stage container status pipeline, full CRUD persistence, and fleet-wide analytics dashboard; production-deployed with real data.

Operations Manager / Systems Developer

Nov 2024 – Jan 2026

[Catalyzt Nutrition](#), Virginia Beach, VA

- ♦ Built full internal application infrastructure from scratch: linked database architecture, role-based user interfaces, automated workflow logic, and client-facing forms with validation — all deployed to production and used daily by real end users.
- ♦ Implemented custom JavaScript scripts via Airtable Scripting Extension to handle advanced batch processing, automation edge cases, and data integrity logic.

Data Analyst / Project Manager

Mar 2022 – Jul 2024

[Ferguson Enterprises Inc.](#), Remote

- ♦ Built MS Azure and MS SQL Server data pipelines supporting large-scale ecommerce operations; designed and maintained SQL schemas and integration processes.
- ♦ Automated data processing with Python scripting and Excel VBA, eliminating manual workflows.

Smartsheet Administrator

Aug 2023 – Feb 2024

[SiteLogiQ](#), Remote (Contract)

- ♦ Developed custom solutions using C#, Python, and Java; built automated workflows and integrations with Microsoft Office Suite and external systems.
