

ALEXANDER TOBIN

(757) 289-1204 ◆ atobin@alum.utk.edu ◆ Virginia Beach, VA

◆ EDUCATION

Bachelor of Arts — Pre Law/Legal Studies, Business Concentration
University of Tennessee, Knoxville, TN — Aug 2019

◆ PROFESSIONAL SUMMARY

Independent options trader and consultant with 15 years of experience researching, structuring, and executing multi-leg options strategies across equities, ETFs, and index products. Deep command of options pricing, the Greeks, implied vs. realized volatility, skew and term structure, and margin mechanics under both Reg-T and portfolio margin frameworks. Founder of primelayertrades.com — an active options research and trade idea platform. Specializes in defined-risk and margin-eligible short-premium strategies: verticals, condors, calendars, diagonals, and covered structures. Every trade idea arrives with a complete plan — entry, exit, maximum loss, and adjustment conditions — and a clear thesis defending why the trade, why now, and what invalidates it.

◆ CORE TRADING SKILLS

- Options Pricing & Greeks (Delta, Gamma, Theta, Vega, Rho) · IV/RV Analysis · Skew & Term Structure
- Multi-Leg Strategy Construction: Verticals · Iron Condors · Calendars · Diagonals · Covered Structures
- Defined-Risk Trade Construction · Short-Premium Strategies · Margin-Eligible Trade Structuring
- Reg-T & Portfolio Margin Mechanics · Position Sizing & Risk Parameterization
- Trade Thesis Development · Entry/Exit/Adjustment Planning · Stop Conditions
- Technical Analysis · Market Regime Assessment · Earnings & Event-Driven Strategies
- Written Trade Idea Communication · P&L; Attribution · Performance Tracking

◆ TRADING EXPERIENCE

Founder & Lead Options Analyst

2020 – Present

primelayertrades.com

- ◆ Operate an active options research and trade idea platform; research, structure, and publish fully specified multi-leg options strategies across equities, ETFs, and index products.
- ◆ Generate written trade ideas with complete plans: underlying, structure, strikes, expirations, net debit/credit targets, entry/exit levels, maximum loss, adjustment triggers, and invalidation conditions.
- ◆ Specialize in short-premium and defined-risk structures in appropriate market regimes — iron condors, credit spreads, calendars, diagonals, and covered positions — with sizing rationale consistent with margin requirements.
- ◆ Maintain rigorous P&L; tracking and idea attribution; analyze winners and losers to refine process and improve idea quality over time.
- ◆ Apply IV rank/percentile, skew analysis, and term structure assessment to identify favorable risk/reward environments for each strategy type.

Independent Options Trader

2011 – Present

Self-Directed
