

Alexander Tobin

Senior Data & Analytics Leader

(757) 289-1204 ◆ atobin@alum.utk.edu ◆ Virginia Beach, VA

◆ CORE SKILLS

Data modeling & architecture — dimensional modeling, source-to-target mapping, data lineage, production refactoring

SQL / Python — complex transformation logic, stored procedures, views, ETL pipeline development

dbt · Salesforce CRM data integration · CRM object model · data quality challenges

Cloud data warehousing — Microsoft Azure (Data Factory, Synapse), PostgreSQL, MS SQL Server

Executive dashboards — Power BI, Tableau; KPI frameworks for C-level and Board audiences

Data governance — shared KPI definitions, source-of-truth standards, metadata documentation, stewardship

Stakeholder discovery — structured executive interviews, translating business questions into technical roadmaps

◆ EDUCATION

Bachelor of Arts — Pre Law/Legal Studies, Business Concentration
University of Tennessee, Knoxville, TN — Aug 2019

◆ CERTIFICATIONS

- ◆ Google Analytics Certification
- ◆ Google Project Management Certification
- ◆ DP-203: Data Engineering on Microsoft Azure (In progress)

◆ PROFESSIONAL SUMMARY

Senior data analyst and analytics engineer with a track record of operating as a one-person data team — owning the full stack from raw data ingestion through transformation, modeling, executive dashboards, and governance. Experienced conducting structured discovery with executives and functional leaders to surface latent data requirements, translating those into prioritized roadmaps, and delivering reliable analytics products that non-technical stakeholders can act on without analyst bottlenecks. Strong SQL and Python skills; hands-on with Microsoft Azure, Salesforce CRM data integration, and data pipeline development. Deep background in data governance, KPI framework design, source-of-truth documentation, and building data literacy across organizations. Passionate believer in mission-driven work and the power of well-structured data to move organizations forward.

◆ PROFESSIONAL EXPERIENCE

Freelance Data Engineer & Analytics Consultant

Jan 2026 – Present

Self-Employed

- ◆ Built end-to-end data platforms as a one-person data team — PostgreSQL-backed data pipelines with structured ingestion, fact-style curated reporting tables, data quality monitoring at every transformation step, and executive-facing analytics interfaces.
- ◆ Built **Capitol Mirror** — automated data ingestion pipeline (GitHub Actions) feeding a curated data model; designed source-to-target mappings, transformation logic, and KPI-level reporting consumed by end users without analyst intervention.
- ◆ Authored complete governance documentation for deployed data systems — data dictionary entries, source-of-target mappings, pipeline specifications, and data lineage records maintained in version-controlled repositories.

Senior Data Analytics Manager

Nov 2024 – Jan 2026

Catalyzt Nutrition, Virginia Beach, VA

- ◆ Served as the organization's sole data resource — built analytics infrastructure from scratch, designed KPI frameworks, and owned all data from ingestion through executive reporting across clinical, operations, and finance functions.
- ◆ Conducted structured discovery with C-level leadership to surface the key business questions the data couldn't yet answer; translated those into a prioritized roadmap of instrumentation gaps, model changes, and reporting deliverables.
- ◆ Maintained the organization's data dictionary, KPI definitions, and metric documentation — enforcing source-of-truth standards and consistent terminology across all teams and leadership reporting.

Data Analyst / Project Manager

Mar 2022 – Jul 2024

Ferguson Enterprises Inc., Remote

- ◆ Built and maintained complex SQL queries, stored procedures, and views against large MS SQL Server enterprise databases — extracting and transforming raw operational data into curated, reporting-ready datasets.
- ◆ Designed ETL pipelines on Microsoft Azure (Azure Data Factory, Synapse) integrating Salesforce CRM data with enterprise analytics systems; maintained source-to-target mapping documentation and data lineage records.
- ◆ Built Power BI executive dashboards and KPI frameworks adopted across Finance, Operations, and IT; presented findings to senior leadership; drove data-driven decision-making across the organization.
