Hiring Team

Dear Hiring Team,

I am writing to apply for the Senior Operations Specialist – Strategic Initiatives role. Strategic operations, process improvement, and cross-functional initiative management are the core of what I have done throughout my career — leading high-stakes projects, mapping and improving business processes, coordinating stakeholders across departments, and building the tracking and documentation infrastructure that keeps complex initiatives on schedule and on target.

My Six Sigma methodology expertise, advanced Smartsheet administration, and Salesforce experience align directly with what this role requires. At Ferguson Enterprises, I applied Six Sigma process improvement principles to eliminate operational bottlenecks, managed Salesforce CRM administration and workflow configuration, facilitated cross-functional requirements-gathering and impact assessment sessions, and delivered initiative reporting directly to the CFO, VP of Finance, and EVP of Sales. At Catalyzt Nutrition, I led strategic operations across a multi-location environment — mapping current-state business processes, conducting stakeholder interviews, designing improved workflows, implementing real-time Smartsheet tracking systems, and authoring the SOPs and operational documentation that made process changes stick. My Smartsheet expertise extends to two dedicated contract engagements: as Smartsheet Administrator at SiteLogiQ, where I configured workspaces, built automated workflows, and managed governance and user training, and as Smartsheet Analyst on a Health and Human Services PMO contract at Integrated Management Strategies, where I built and maintained project tracking and reporting infrastructure for a government services team.

In my current freelance practice, I am serving as a strategic operations and systems consultant for organizations including callcatchai.online, primelayertrades.com, and hereraspreadsheets.com — leading process mapping engagements, building Salesforce-integrated operational dashboards, designing Smartsheet-based initiative tracking systems, and delivering the kind of cross-functional alignment and documentation discipline that makes operational improvements durable.

I am a disciplined, process-oriented operator with strong stakeholder communication skills and a track record of translating strategic objectives into measurable outcomes. I would welcome the opportunity to discuss this role and how my experience fits what your Services Operations team is building.

Thank you for your consideration.
