Hiring Manager

Dear Hiring Manager,

I am applying for the Senior Digital Marketing Analyst contract role supporting SEO, web analytics, and campaign performance reporting. The combination of responsibilities described here — building recurring dashboards and quarterly reports, managing UTM and event tracking frameworks, improving organic and AI-driven search visibility, and maintaining location data accuracy — maps closely to work I have been doing across multiple engagements, and I am fully remote and East Coast based.

On the analytics and reporting side: I have built and maintained web analytics infrastructure using Google Analytics, Google Search Console, and SEMrush — configuring custom event tracking, establishing UTM parameter standards, and producing recurring campaign performance reports that translate digital data into actionable insights for marketing and communications teams. At Catalyzt Nutrition, I owned the organization's complete digital analytics function: built KPI dashboards, established tracking standards across all channels, produced recurring and ad hoc reporting, and presented performance findings directly to leadership. On the freelance side, I configure campaign measurement pipelines, monitor performance trends, and maintain reporting workflows for production digital platforms across multiple properties.

On the SEO and AEO/GEO side: I have hands-on experience with SEMrush, keyword research, ranking analysis, and content optimization for both traditional and AI-driven search. I have implemented answer engine optimization and generative engine optimization strategies — optimizing structured data, content architecture, and entity authority to improve visibility in AI-generated search results. I have also managed location data accuracy across digital platforms, resolving duplicate listings, inconsistent naming, and outdated content to maintain clean online presence across properties.

I would welcome the opportunity to discuss how this experience applies to your healthcare digital environment.

Sincerely,
Alexander Tobin
