

Alexander Tobin

Business Intelligence Developer & Data Analyst

(757) 289-1204 ♦ atobin@alum.utk.edu ♦ Virginia Beach, VA

CORE SKILLS

Tableau · Power BI — interactive dashboards, advanced analytics, published reporting, data visualization

SQL / MS SQL Server — complex queries, stored procedures, views, data modeling, multi-source unification

Data modeling — dimensional design, curated reporting layers, single source of truth development

BI governance — reporting standards, data integrity, security policies, access controls

Business needs analysis — stakeholder facilitation, requirements gathering, process documentation

Stakeholder consulting — translating technical concepts for non-technical leadership and end-users

Microsoft Azure · DevOps · CI/CD · Python · Excel (advanced) · Git/GitHub

EDUCATION

Bachelor of Arts — Pre Law/Legal Studies, Business Concentration
University of Tennessee, Knoxville, TN — Aug 2019

CERTIFICATIONS

- ♦ Google Project Management Certification
- ♦ Google Analytics Certification
- ♦ DP-203: Data Engineering on Microsoft Azure (In progress)

PROFESSIONAL SUMMARY

Business intelligence developer and data analyst with hands-on experience designing and deploying interactive dashboards, curated data models, and enterprise reporting solutions consumed by executive and operational stakeholders. Experienced with Tableau and Power BI for advanced analytics and dashboard development, and with SQL and relational databases for building the clean, unified data layers that reliable reporting depends on. Skilled at translating complex business requirements into clear visual analytics, facilitating stakeholder sessions to identify efficiencies, and governing data and reporting standards across organizations. Background in data governance, process documentation, and working cross-functionally with leadership, IT, and external vendors to deliver BI solutions that drive decision-making.

PROFESSIONAL EXPERIENCE

Freelance Data Developer & BI Consultant

Jan 2026 – Present

Self-Employed

- ♦ Designed and deployed end-to-end data platforms with structured ingestion pipelines, curated reporting layers, and interactive analytics dashboards — serving as the single source of truth for client business performance data.
- ♦ Built PostgreSQL-backed dimensional data models with fact-style and dimensional table design; wrote complex SQL transformation logic and validated data quality at every stage before it reached reporting layers.
- ♦ Produced recurring and ad hoc BI deliverables for client stakeholders; trained end-users on how to navigate and act on dashboard outputs without analyst bottlenecks.
- ♦ Maintained version-controlled documentation for all data model specifications, metric definitions, and reporting governance standards.

Operations Manager / Data & Systems Developer

Nov 2024 – Jan 2026

Catalyzt Nutrition, Virginia Beach, VA

- ♦ Served as the organization's sole BI resource — built analytics dashboards and KPI frameworks from scratch, documented every metric definition and data source, and trained all report consumers across clinical, finance, and operations.
- ♦ Designed and enforced data governance standards for all organizational reporting — maintaining a data dictionary, KPI definitions, and documented calculation logic for executive and board-level audiences.
- ♦ Facilitated requirements sessions with department heads and C-level leadership to translate business objectives into structured data models and actionable reporting outputs.
- ♦ Authored compliance documentation and governance standards for all data systems; managed review cycles with senior leadership to ensure accuracy before publishing final deliverables.

EDI Integrations & Data Analyst

Mar 2022 – Jul 2024

Ferguson Enterprises Inc., Remote

- ♦ Developed Power BI executive dashboards and KPI frameworks adopted across Finance, Operations, and IT; presented findings to senior leadership and drove data-driven decision-making at the enterprise level.
- ♦ Built complex SQL queries, stored procedures, and views against large MS SQL Server enterprise databases; designed ETL pipelines on Microsoft Azure transforming raw operational data into curated, reporting-ready datasets.

Smartsheet Administrator

Aug 2023 – Feb 2024

SiteLogIQ, Remote (Contract)
