

Alexander Tobin

Web Developer & AI Specialist

(757) 289-1204 ◆ atobin@alum.utk.edu ◆ Virginia Beach, VA

CORE SKILLS

Next.js / React / TypeScript — full-stack web application development

Claude Code / Claude API / Azure OpenAI — AI integration, agent workflows, automation

PostgreSQL / Supabase — schema design, query optimization, row-level security

Docker — containerization and deployment

GitHub — version control, branching strategies, pull-request workflows, CI/CD (GitHub Actions)

REST APIs & custom connectors

Python — scripting, automation, data processing

Cloud deployment — Vercel, DigitalOcean, Azure, PM2

Secure software development practices

EDUCATION

Bachelor of Arts — Pre Law/Legal Studies, Business Concentration
University of Tennessee, Knoxville, TN — Aug 2019

CERTIFICATIONS

- ◆ DP-203: Data Engineering on Microsoft Azure (In progress)
- ◆ AWS Certified DevOps Engineer (In progress)
- ◆ Google Analytics Certification
- ◆ Google Project Management Certification

PROFESSIONAL SUMMARY

Full-stack web developer and AI specialist with production experience building and deploying Next.js applications, integrating Claude and OpenAI APIs into real workflows, and managing PostgreSQL databases with complex schemas and performance requirements. Proficient in GitHub-based collaborative development, CI/CD pipelines, and cloud deployment — with a strong focus on AI-driven automation that replaces manual processes and scales with the business.

PROFESSIONAL EXPERIENCE

Freelance Developer & AI Specialist

Jan 2026 – Present

Self-Employed

- ◆ Built **Capitol Mirror** — production AI-enabled SaaS (Next.js, TypeScript, Supabase/PostgreSQL, Stripe) with automated GitHub Actions ingestion pipeline, LLM-powered natural language data interface, Stripe billing (Free / \$30 / \$65/mo tiers), and DigitalOcean/PM2 production deployment; implemented schema validation, data quality controls, and row-level security throughout.
- ◆ Built **AdvisoryCloud 3.0** — full-stack SaaS (React 18, Supabase/PostgreSQL, Edge Functions/Deno, Tailwind, PWA) with 15+ normalized database tables, real-time messaging, role-based access, and AI-assisted workflows; zero to production in 7 days.
- ◆ Built **Container Tracker** — full-stack logistics platform (React, Supabase, Vercel) with live shipping API integration, 6-stage ETL pipeline, and fleet analytics dashboard.

Operations Manager / Systems Developer

Nov 2024 – Jan 2026

Catalyzt Nutrition, Virginia Beach, VA

- ◆ Designed and deployed AI-enabled automation infrastructure; integrated third-party APIs and external data sources via Python scripting and custom automations.
- ◆ Directed AI-assisted development of mobile application features; governed production deployment and monitored performance post-launch.
- ◆ Implemented custom JavaScript for advanced business logic, batch processing, and automation edge cases.

Data Analyst, Project Manager

Mar 2022 – Jul 2024

Ferguson Enterprises Inc., Remote

- ◆ Built data pipelines and automation workflows on Microsoft Azure and MS SQL Server; designed validation rules and quality monitoring at ingestion points.
- ◆ Led cross-functional technology integration projects; evaluated and deployed new tooling across IT, Finance, and Operations.
- ◆ Maintained governance documentation, data lineage, and technical process documentation throughout.

Smartsheet Administrator

Aug 2023 – Feb 2024

SiteLogiQ, Remote (Contract)

- ◆ Built automated workflows using Python, C#, and Java; maintained API integrations, system documentation, and access governance.
