

Alexander Tobin

AI Systems Designer & Workflow Experience Specialist

(757) 289-1204 ♦ atobin@alum.utk.edu ♦ Virginia Beach, VA

CORE SKILLS

AI workflow design — prompt frameworks, agentic pipelines, human-AI interaction layers, escalation logic

Prompt engineering — structured prompt design, validation, fallback logic, drift-resistant output formats

LLM application development — Claude API, Azure OpenAI, RAG architecture, copilot-style interfaces

Business AI consulting — facilitating workshops, identifying use cases, driving adoption, measuring ROI

User-facing documentation — playbooks, SOPs, onboarding guides, workflow diagrams

AI governance — responsible AI standards, accuracy monitoring, drift detection, documentation

Python scripting · REST APIs · data pipeline development

Git/GitHub · CI/CD · cloud deployment (Vercel, Azure, Supabase)

EDUCATION

Bachelor of Arts — Pre Law/Legal Studies, Business Concentration
University of Tennessee, Knoxville, TN — Aug 2019

CERTIFICATIONS

♦ Google Project Management Certification

♦ Google Analytics Certification

♦ DP-203: Data Engineering on Microsoft Azure (In progress)

PROFESSIONAL SUMMARY

AI systems developer and business AI consultant with hands-on production experience designing human-centered AI interaction layers — prompt frameworks, agentic workflow architectures, feedback loops, and adoption enablement pathways. Skilled at translating complex AI capabilities into intuitive, trusted workflows that business users actually adopt. Experienced facilitating stakeholder workshops to surface requirements, validate AI use cases, and drive adoption across organizations. Strong background in prompt engineering, LLM-powered product development, and the governance and documentation practices that make AI systems reliable in enterprise environments.

PROFESSIONAL EXPERIENCE

Freelance Developer & AI Systems Designer

Jan 2026 – Present

Self-Employed

- ◆ Designed and built production AI interaction layers for multiple platforms — custom prompt frameworks with structured validation, fallback logic, and consistent output formats deployed to real end users.
- ◆ Built **Capitol Mirror** — AI-enabled SaaS with LLM-powered analytics interface, automated data ingestion pipeline, and governance controls; designed the full user-facing AI interaction experience from concept through deployment.
- ◆ Developed agentic workflow architectures replacing manual operational processes with intelligent, monitored pipelines — including human review checkpoints and escalation paths.

Operations Manager / AI & Systems Designer

Nov 2024 – Jan 2026

Catalyzt Nutrition, Virginia Beach, VA

- ◆ Served as the organization's primary AI and automation implementer — facilitated solution workshops with leadership, designed AI-powered workflows, and led adoption and training across the team.
- ◆ Designed multi-step agentic automation pipelines connecting CRM, scheduling, and operational platforms; built human-override checkpoints and escalation paths into every workflow.
- ◆ Partnered directly with executive leadership to translate business problems into AI solutions — presenting recommendations, explaining tradeoffs, and measuring operational impact post-deployment.

Data Analyst / Project Manager

Mar 2022 – Jul 2024

Ferguson Enterprises Inc., Remote

- ◆ Designed and facilitated cross-functional technology implementation projects — gathered requirements, facilitated stakeholder working sessions, defined adoption pathways, and drove enterprise-wide rollout.
- ◆ Built executive dashboards and KPI frameworks using Power BI; translated complex data into accessible, decision-ready formats for C-level leadership.
- ◆ Maintained data lineage documentation, integration specifications, and workflow documentation in version-controlled repositories.

Smartsheet Administrator

Aug 2023 – Feb 2024

SiteLogiQ, Remote (Contract)

- ◆ Built automated workflow systems and maintained documentation of workflow logic, process schemas, and platform configurations.
