

Alexander Tobin

SQL ETL Developer & Data Analyst

(757) 289-1204 ♦ atobin@alum.utk.edu ♦ Virginia Beach, VA

CORE SKILLS

Advanced SQL — complex joins, window functions, subqueries, stored procedures, query optimization

ETL/ELT pipeline design — ingestion, transformation, validation, quality monitoring

Microsoft Azure — Azure Synapse, Azure Data Factory, cloud data platform workflows

Power BI — dashboard development and self-service reporting

Python — data automation, processing, and API integration

Data validation, cleansing, and cross-system reconciliation

Data governance documentation — data definitions, source-to-target mappings, schema documentation

MS SQL Server — database objects, stored procedures, views

EDUCATION

Bachelor of Arts — Pre Law/Legal Studies, Business Concentration
University of Tennessee, Knoxville, TN — Aug 2019

CERTIFICATIONS

- ♦ DP-203: Data Engineering on Microsoft Azure (In progress)
- ♦ Google Analytics Certification
- ♦ Google Project Management Certification

PROFESSIONAL SUMMARY

SQL developer and data engineer with hands-on experience building and maintaining ETL pipelines, writing complex production-quality SQL, and delivering accurate, well-documented data to analysts and business stakeholders. Experienced with cloud data platforms on Microsoft Azure, data validation and quality monitoring, and cross-system reconciliation. Proven ability to own ETL workflows end-to-end in fast-moving, mission-driven environments.

PROFESSIONAL EXPERIENCE

Freelance Developer & Data Analyst Contractor

Jan 2026 – Present

Self-Employed

- ♦ Designed and built production data platforms with structured PostgreSQL schemas, complex ETL transformation pipelines, and source-to-target mappings — including validation rules and quality monitoring at every ingestion point.
- ♦ Built Capitol Mirror — enterprise-scale data ingestion platform with automated GitHub Actions pipeline; designed fact-style tables, historical data structures, and governance documentation throughout.
- ♦ Built Container Tracker — logistics data platform with a 6-stage transformation pipeline, cross-system reconciliation, and real-time status validation.

Senior Data Analytics Manager

Nov 2024 – Jan 2026

Catalyzt Nutrition, Virginia Beach, VA

- ♦ Owned data architecture and reporting infrastructure across the organization; maintained data definitions, metric documentation, and governance standards.
- ♦ Automated data workflows using Python and API integrations; maintained data quality and consistency across all reporting outputs.

Data Analyst, Project Manager

Mar 2022 – Jul 2024

Ferguson Enterprises Inc., Remote

- ♦ Developed complex SQL queries and database objects against large MS SQL Server databases; wrote stored procedures, views, and transformation logic for downstream reporting and analytics.
- ♦ Designed and implemented ETL workflows on Microsoft Azure translating legacy data structures into modernized, reporting-ready datasets; maintained comprehensive source-to-target mapping and data lineage documentation.
- ♦ Led multi-source data replication and integration projects consolidating enterprise data sources into a unified analytics environment.

Smartsheet Administrator

Aug 2023 – Feb 2024

SiteLogiQ, Remote (Contract)

- ♦ Built automated data workflows; maintained technical documentation of schemas, transformation logic, and system configurations.

Ecommerce Data Analyst

Jan 2021 – Dec 2021

ZenEvo Chocolate, Knoxville, TN

- ♦ Wrote SQL queries to extract, transform, and validate operational data across planning, manufacturing, and procurement systems.
