

Alexander Tobin

GenAI Data Automation Developer

(757) 289-1204 ♦ atobin@alum.utk.edu ♦ Virginia Beach, VA

◆ CORE SKILLS

Python — data automation, ETL scripting, API integration

SQL / MS SQL Server — stored procedures, query optimization, ETL logic

Microsoft Azure — Azure OpenAI, Azure Data Factory, App Service, Key Vault

AWS — S3, Lambda, and cloud services familiarity

LLM/GenAI — Claude API, Azure OpenAI; prompt engineering, agent workflows

REST API integration in data pipelines and workflows

Git / GitHub / Azure DevOps — CI/CD, version control, pull-request workflows

ETL/ELT pipeline design — ingestion, transformation, validation, quality monitoring

Data governance documentation

◆ EDUCATION

Bachelor of Arts — Pre Law/Legal Studies, Business Concentration
University of Tennessee, Knoxville, TN — Aug 2019

◆ CERTIFICATIONS

◆ DP-203: Data Engineering on Microsoft Azure (In progress)

◆ AWS Certified DevOps Engineer (In progress)

◆ Google Analytics Certification

◆ PROFESSIONAL SUMMARY

Data developer and AI engineer with production experience building ETL pipelines, integrating LLM APIs into automated data workflows, and deploying cloud-based applications on Azure and AWS. Proficient in Python, SQL, and REST API integration — with direct hands-on experience leveraging Azure OpenAI and Claude APIs to automate data quality, transformation, and analytics workflows. Comfortable in hybrid cloud environments and CI/CD-based delivery cycles.

◆ PROFESSIONAL EXPERIENCE

Freelance Developer & Data Analyst Contractor

Jan 2026 – Present

Self-Employed

- ◆ Integrated Claude and Azure OpenAI APIs into production workflows — built LLM-powered data automation for quality monitoring, anomaly detection, and natural language data interfaces replacing manual reporting processes.
- ◆ Built **Capitol Mirror** — production data ingestion platform with automated GitHub Actions pipeline, structured PostgreSQL schemas, source-to-target mappings, and governance documentation; deployed to DigitalOcean with CI/CD.
- ◆ Designed multi-stage ETL pipelines with validation rules and quality monitoring at every ingestion point across multiple production platforms.
- ◆ Deployed all projects to production using cloud platforms (Vercel, DigitalOcean, Azure) with environment management and CI/CD pipelines.

Operations Manager / Systems Developer

Nov 2024 – Jan 2026

Catalyzt Nutrition, Virginia Beach, VA

- ◆ Designed and deployed AI-enabled automation infrastructure — integrated third-party APIs and external data sources via Python scripting and platform automations to eliminate manual workflows.
- ◆ Built automated data pipelines and reporting workflows connecting multiple operational systems.

Data Analyst, Project Manager

Mar 2022 – Jul 2024

Ferguson Enterprises Inc., Remote

- ◆ Built data ingestion pipelines and ETL automation workflows on Microsoft Azure and MS SQL Server; designed validation rules and quality monitoring at ingestion points.
- ◆ Developed complex SQL queries, stored procedures, and transformation logic supporting enterprise reporting and analytics.
- ◆ Applied Python and Azure Data Factory for ETL automation; maintained data lineage and governance documentation.
- ◆ Led multi-source data integration projects across IT, Finance, and Operations.

Smartsheet Administrator

Aug 2023 – Feb 2024

SiteLogiQ, Remote (Contract)

- ◆ Built automated data workflows using Python, C#, and Java; maintained API integrations and system documentation.
