

Alexander Tobin

AI Analyst & Full-Stack Developer

(757) 289-1204 ♦ atobin@alum.utk.edu ♦ Virginia Beach, VA

◆ CORE SKILLS

LLMs, RAG pipelines, AI agents — design, development, prompt engineering, and evaluation

Python — AI/ML libraries, scripting, automation, data transformation

Azure AI services — cloud-based AI integration, Azure DevOps, CI/CD pipelines

SQL / MS SQL Server — complex queries, data analysis, enterprise database integration

API integration — REST APIs, enterprise system connectivity, AI solution embedding

Enterprise AI implementation — solution design, testing, deployment, monitoring, documentation

Responsible AI — governance standards, model evaluation, limitations documentation, compliance

Git / GitHub · version control · structured documentation workflows

◆ EDUCATION

Bachelor of Arts — Pre Law/Legal Studies, Business Concentration
University of Tennessee, Knoxville, TN — Aug 2019

◆ CERTIFICATIONS

◆ Google Project Management Certification

◆ Google Analytics Certification

◆ DP-203: Data Engineering on Microsoft Azure (In progress)

◆ PROFESSIONAL SUMMARY

AI developer and analyst with hands-on experience designing, building, and deploying production AI applications — including LLM-powered pipelines, RAG architectures, AI agent workflows, and prompt engineering across enterprise and SaaS contexts. Experienced integrating AI capabilities with APIs, databases, and business processes end-to-end: from requirements gathering and solution design through deployment, monitoring, and documentation. Strong foundation in Python, SQL, Azure cloud services, and CI/CD pipelines. Skilled at translating complex business requirements into working AI solutions and communicating technical findings to both technical and non-technical stakeholders.

◆ PROFESSIONAL EXPERIENCE

Freelance AI Developer & Systems Architect

Jan 2026 – Present

Self-Employed

- ◆ Designed and deployed AI-powered production applications using LLM APIs, prompt engineering, and RAG architectures — integrating AI capabilities with PostgreSQL databases, REST APIs, and cloud-hosted backend services.
- ◆ Built **CallCatch AI** (callcatchai.online) — an AI-driven call analysis and business intelligence platform; engineered prompt pipelines, LLM integration, and automated data extraction workflows for real-time business insights.
- ◆ Built **PrimeLayer** (primelayer.solutions) — full-stack data platform with AI-assisted analysis layers, automated ingestion pipelines, and structured reporting; deployed to production with CI/CD on Vercel and DigitalOcean.

Operations Manager / AI & Systems Developer

Nov 2024 – Jan 2026

Catalyzt Nutrition, Virginia Beach, VA

- ◆ Identified and implemented AI-driven solutions across operations — evaluating tools, designing workflows, and deploying automation that improved efficiency across clinical, finance, and operations functions.
- ◆ Built AI-assisted data analysis pipelines and reporting systems; integrated AI outputs with operational dashboards consumed by C-level leadership and board audiences.
- ◆ Authored governance documentation, compliance standards, and implementation guides for all AI and technology initiatives — coordinating with senior leadership to ensure accuracy and regulatory alignment.

EDI Integrations & Data Analyst

Mar 2022 – Jul 2024

Ferguson Enterprises Inc., Remote

- ◆ Integrated enterprise data systems using Azure cloud services, MS SQL Server, and REST APIs — building reliable pipelines that connected source systems with downstream analytics and reporting.
- ◆ Developed and maintained technical documentation for all integration specifications, data lineage, and system architecture — written to compliance standards reviewed by IT leadership, operations, and external partners.
- ◆ Led cross-functional technology projects coordinating SMEs across IT, operations, and external trading partners; managed timelines and quality review processes against submission deadlines.

Smartsheet Administrator

Aug 2023 – Feb 2024

SiteLogiQ, Remote (Contract)

- ◆ Supported government contract proposal development and implemented platform automation solutions; documented all configurations, workflow logic, and compliance requirements tied to contract scope.
