PROFESSIONAL SUMMARY

Systems-thinking developer and automation architect with hands-on experience designing and deploying AI-assisted workflows, multi-step automation pipelines, and agent-based integrations across marketing, analytics, and operational systems. Proficient in Python, JavaScript, SQL, and REST APIs — with practical experience building with LLMs (Claude, Codex), Power Automate, Airtable Automations, and webhook-driven architectures. Comfortable acting as an internal consultant: translating ambiguous business problems into structured, scalable automation solutions and shipping them to production.

PROFESSIONAL EXPERIENCE

Freelance AI Developer & Automation Architect

Jan 2026 – Present

Self-Employed

- ♦ Designed and deployed **Capitol Mirror** — an autonomous data pipeline using GitHub Actions that scrapes, processes, and loads government STOCK Act filings daily into a PostgreSQL backend without manual intervention; full agentic architecture with real-time webhook triggers and Stripe payment integrations.
- ♦ Built **AdvisoryCloud 3.0** — a SaaS platform with Supabase Edge Functions (Deno) handling server-side agent logic, real-time event processing, and automated email invite workflows via Resend API; architected multi-step automation from user action through backend execution to notification delivery.
- ♦ Integrated LLM APIs and webhook-driven automation across multiple client projects, connecting disparate systems via REST APIs to eliminate manual handoffs and scale operations.
- ♦ Developed reusable agent templates, prompt frameworks, and automation scaffolding applicable across client engagements.

Senior Data Analytics Manager

Nov 2024 – Jan 2026

Catalyzt Nutrition, Virginia Beach, VA

- ♦ Architected AI-assisted workflows and automation systems to replace manual operational processes across marketing, inventory, and reporting functions.
- ♦ Implemented multi-step Airtable Automations with conditional logic, API triggers, and third-party integrations to automate recurring marketing and operational tasks.
- ♦ Built custom JavaScript scripts via Airtable Scripting Extension to handle advanced agent-like logic, batch processing, and automation edge cases.
- ♦ Directed development of mobile application features and digital marketing automation (Mailchimp, Klaviyo) integrated with operational data systems.

Data Analyst / Project Manager

Mar 2022 – Jul 2024

Ferguson Enterprises Inc., Remote

- ♦ Designed and deployed centralized Airtable automation infrastructure adopted company-wide — replacing manual workflows with trigger-based, multi-step automation pipelines integrated via API with external systems.
- ♦ Built Power Automate workflows connecting Microsoft Azure, SQL Server, and business tools to automate data flows and reduce manual processing.
