Sharecare

Hiring Manager

Dear Hiring Manager,

I am writing to apply for the Billing Specialist role at Sharecare. Data integrity within a billing system, proactive discrepancy resolution, and meticulous accounts receivable documentation are disciplines I have practiced across multiple roles — and they are exactly what you have described.

Billing Data Integrity and Account Validation

At Ferguson Enterprises, I compiled and validated financial claims data using Excel and Airtable — maintaining detailed records and audit trails for every claim, identifying discrepancies between submitted documentation and system records, and escalating unresolved items with clear notes and decision rationale. The core discipline was the same as what you have described: validate before committing, document completely, address discrepancies before they age. I understand that a billing system with dirty data creates downstream problems that compound — missed revenue, dispute escalations, and compliance exposure — and I treat data accuracy as a non-negotiable baseline.

Invoice Processing and AR Coordination

I managed billing, invoicing, and payment reconciliation for four active freelance clients — callcatchai.online, primelayertrades.com, hereraspreadsheets.com, and kizunaperformance.com — coordinating with clients on account data accuracy, payment status, and billing questions. At Born Primitive, I processed high-volume records to strict accuracy standards and produced reports using advanced spreadsheet functions to support financial review. At ZenEvo Chocolate, I managed vendor invoices, bills of lading, and purchase order documentation, coordinating with suppliers on billing disputes and payment reconciliation.

Cross-Functional Coordination and Customer Communication

I work comfortably across internal departments — coordinating with sales, customer service, and finance teams on billing issues — and I communicate with external customers professionally and clearly. When a billing dispute arises, I gather the facts, present the information accurately, and resolve it at the source rather than letting it escalate.

I am confident I can maintain the accuracy and compliance standards Sharecare requires for its billing operations. I look forward to the conversation.

Sincerely,
Alexander Tobin
