CTM Unlimited

Hiring Manager

Dear Hiring Manager,

I am writing to express my strong interest in the Data Analyst contract role supporting CTM Unlimited's enterprise transformation program. With 7+ years of experience building dashboards, managing recurring reports across evolving multi-source data environments, and operating as an active 1099 independent contractor, I am well positioned to deliver on this engagement from day one.

Recurring Reporting Across Evolving Data

The description of this role resonates directly with work I do daily. In my freelance practice supporting [callcatchai.online](#), [primelayertrades.com](#), and [hereraspreadsheets.com](#), I maintain executive KPI dashboards that pull from multiple data sources on different schedules — each with varying levels of maturity and completeness. I built the reconciliation and validation logic that keeps those reports accurate regardless of what changes upstream. At Ferguson Enterprises, I managed recurring Power BI reporting for CFO-level stakeholders across a large ecommerce and supply chain operation — same discipline: keep the numbers clean, keep the cadence reliable, and surface quality issues before they reach leadership. That is exactly what this role requires.

Survey Analytics, Adoption Metrics, and Change Reporting

I have supported organizational readiness and adoption analytics in direct practice. At Catalyzt Nutrition, I built tracking frameworks measuring adoption of new operational systems across departments — engagement, completion, and progress metrics formatted for leadership consumption. I understand that transformation data is messy and that the real value is in maintaining accuracy through the churn, not just building a clean dashboard at launch. I am comfortable flagging issues, communicating clearly, and adjusting as program priorities evolve.

AI-Enabled by Default

I use Claude, Microsoft Copilot, ChatGPT, and Python automation daily to accelerate data preparation, report generation, and documentation — this is not a resume line item, it is how I actually work. I can speak concretely to exactly how I use each tool and where I still do the work myself.

I am available as a 1099 independent contractor and can start quickly. I would welcome the chance to discuss my experience supporting transformation program analytics and how I can contribute to CTM Unlimited's reporting needs.

Sincerely,
Alexander Tobin
