Relocity

Hiring Manager

Dear Hiring Manager,

I am writing to apply for the People Operations Coordinator role at Relocity. The combination of HR operational support, Airtable proficiency, and distributed workforce coordination in this description maps closely to work I have done throughout my career — and the explicit mention of Airtable as a plus caught my attention immediately, because it is one of my strongest skills.

Airtable and HR Operations Systems

I have built Airtable systems from the ground up for operational data management: linked records, rollup fields, formula logic, role-based Interfaces, automated workflows, and permission-aware views tailored to specific team functions. At Catalyzt Nutrition, I designed the operational infrastructure that tracked personnel records, task assignments, and compliance deadlines — all built on Airtable with automation reducing manual entry and keeping records current. At Ferguson Enterprises, I introduced Airtable as the centralized project management platform for a cross-functional team, coordinated onboarding of new users, maintained access controls, and produced compliance documentation for leadership review. The Relocity HRIS and employee lifecycle work you have described is exactly this kind of structured, systems-driven operations work.

Onboarding, Offboarding, and Compliance Coordination

At Integrated Management Strategies, I worked on the Health and Human Services contract building Smartsheet tracking systems for the PMO — including onboarding and offboarding milestones, HR compliance deadlines, and personnel change tracking across a distributed workforce. I understand what it means to coordinate these workflows across jurisdictions with different documentation requirements, escalate where needed, and maintain records at the standard required for compliance review.

Discretion and Remote Operations

I handle confidential information with discretion as a baseline professional expectation, not an afterthought. My current freelance practice — serving calldcatchai.online, primelayertrades.com, hereraspreadsheets.com, and kizunaperformance.com — requires managing sensitive client data, business records, and proprietary information across every engagement. I operate fully remotely, independently, and at a high standard without supervision.

I would welcome the opportunity to discuss how my Airtable expertise and operational coordination background fit your team's needs.

Sincerely,
Alexander Tobin
