

Alexander Tobin

AI Solutions Architect & Enterprise Automation Specialist

(757) 289-1204 ◆ atobin@alum.utk.edu ◆ Virginia Beach, VA

◆ CORE SKILLS

AI solutions architecture —
agentic workflows, LLM-powered
platforms, human-in-the-loop
design, escalation logic

Azure OpenAI · Claude API · RAG
architecture · prompt
engineering · AI agent
development

Salesforce platform development
— workflow automation, CRM
integrations, data
architecture, process design

Enterprise integrations —
API-driven architectures, REST
APIs, third-party platform
connectors, ETL pipelines

AI governance · responsible AI
standards · compliance
documentation · accuracy
monitoring · auditability

Business AI consulting —
identifying use cases,
facilitating workshops,
prioritizing phases, measuring
ROI

Microsoft Azure · Python ·
PostgreSQL · Git/GitHub · CI/CD
· cloud deployment

◆ EDUCATION

Bachelor of Arts — Pre Law/Legal
Studies, Business Concentration
University of Tennessee, Knoxville,
TN — Aug 2019

◆ CERTIFICATIONS

- ◆ Google Project Management Certification
- ◆ Google Analytics Certification
- ◆ DP-203: Data Engineering on Microsoft Azure (In progress)

◆ PROFESSIONAL SUMMARY

AI solutions architect with production experience designing LLM-powered platforms, agentic workflows, and API-driven enterprise integrations. Skilled at identifying high-value AI opportunities, designing human-in-the-loop architectures, and translating business problems into phased, governed AI solutions. Strong background in Azure OpenAI, Claude API, Salesforce development, and responsible AI governance. Experienced partnering with executive leadership to define KPIs, prioritize implementation phases, and measure operational impact.

◆ PROFESSIONAL EXPERIENCE

Freelance AI Architect & Developer

Jan 2026 – Present

Self-Employed

- ◆ Designed and deployed production AI platforms integrating Claude API and Azure OpenAI — agentic workflow systems, RAG-style content pipelines, and LLM-powered analytics interfaces with human review checkpoints and escalation paths.
- ◆ Built **Capitol Mirror** — AI-enabled SaaS with automated data ingestion, LLM-powered analytics interface, and governance controls; architected end-to-end from design through production deployment.
- ◆ Designed prompt engineering frameworks with structured validation, fallback logic, and drift-resistant output formats for production AI applications.
- ◆ Developed phased implementation roadmaps balancing native platform capabilities, third-party integrations, and custom development based on business priority and compliance requirements.

Operations Manager / AI & Systems Architect

Nov 2024 – Jan 2026

Catalyzt Nutrition, Virginia Beach, VA

- ◆ Served as primary AI and automation architect — facilitated executive workshops, designed AI-powered workflows, and led adoption across the organization.
- ◆ Designed agentic automation pipelines connecting Salesforce CRM, scheduling, and operational platforms with intelligent routing, human-override mechanisms, and escalation paths.
- ◆ Partnered with executive leadership to define KPIs, present implementation roadmaps, and measure ROI post-deployment.
- ◆ Established AI governance standards — responsible AI practices, accuracy standards, drift monitoring, and audit trails across all deployed systems.

Data Analyst / Project Manager

Mar 2022 – Jul 2024

Ferguson Enterprises Inc., Remote

- ◆ Developed enterprise solutions within Salesforce — workflow automations, data integrations, and API-driven architectures supporting large-scale sales and operations.
- ◆ Built ETL pipelines on Microsoft Azure integrating Salesforce with enterprise analytics systems.
- ◆ Led cross-functional implementation projects — facilitated stakeholder workshops and drove enterprise-wide adoption with executive buy-in.
