SKILLS

EDUCATION

Masters of Business Administration
— University of Illinois (In progress, Dec 2026)
Bachelor of Arts — Pre Law/Legal Studies, Business Concentration
University of Tennessee, Knoxville, TN — Aug 2019

CERTIFICATIONS

- DP-203: Data Engineering on Microsoft Azure *(In progress)*
- AWS Certified DevOps Engineer *(In progress)*
- Google Analytics Certification
- Google Project Management Certification
- UVA Project Management Course

PROFESSIONAL SUMMARY

Power BI Developer and data analytics professional with a proven track record designing and delivering enterprise-grade dashboards, semantic data models, and KPI frameworks across large-scale Microsoft environments. Experienced building Power BI solutions end-to-end — from SQL data validation and DAX measure development to stakeholder-facing visualizations and performance optimization. Deep hands-on experience with MS SQL Server, Microsoft Azure, Azure DevOps, and AI-assisted development using Microsoft Copilot. Skilled at translating complex business requirements into governed, scalable BI solutions and communicating across technical and non-technical audiences in Agile delivery environments. Currently pursuing DP-203: Data Engineering on Microsoft Azure, with active focus on Microsoft Fabric and Direct Lake architecture.

PROFESSIONAL EXPERIENCE

Data Analyst / Project Manager

Mar 2022 – Jul 2024

Ferguson Enterprises Inc., Remote

Ferguson is a \$29B+ enterprise distributor. Role required delivering BI solutions across large-scale ecommerce and supply chain data environments.

- Designed, built, and maintained executive Power BI dashboards and KPI frameworks consumed by senior leadership across multiple departments — from financial performance to supply chain compliance metrics.
- Developed DAX measures and calculated columns to define business logic, complex KPIs, and operational metrics aligned to stakeholder requirements.
- Validated KPIs and metrics against source systems using advanced MS SQL Server queries — ensuring traceability and accuracy between the data layer and final visualizations.
- Leveraged Microsoft Azure for cloud data operations, building and maintaining data pipelines that fed Power BI semantic models at enterprise scale.
- Optimized SQL queries and Power BI data models for performance, reducing dashboard load times and improving report responsiveness.
- Led cross-functional data integration projects using Azure DevOps, coordinating between data engineers, business analysts, and business stakeholders to ensure alignment with governance standards.
- Implemented data validation, conditional formatting, and access controls to ensure data integrity and compliance across user-generated datasets.
- Applied Power Query (M) and Excel VBA to transform and automate data preparation pipelines feeding into BI reporting layers.
- Actively participated in Agile ceremonies — sprint planning, stand-ups, reviews, and retrospectives — delivering BI solutions iteratively within sprint cycles.
- Maintained risk logs and stakeholder reporting documentation within scope and budget across multi-month delivery programs.

Senior Data Analytics Manager

Nov 2024 – Jan 2025

Catalyzt Nutrition, Virginia Beach, VA

- Built analytics and reporting infrastructure from scratch, designing semantic data models and dashboards tailored to business workflows and stakeholder needs.
- Leveraged Microsoft Copilot and AI-assisted tools directly within Power BI to accelerate report creation, generate insights, and surface business patterns faster.
- Analyzed system requirements and translated them into scalable data and visualization solutions aligned with organizational goals.
- Facilitated cross-departmental collaboration to ensure data solutions delivered measurable business value.

- Provided technical guidance and documentation to ensure data governance and best practices were maintained across reporting systems.
- Spearheaded digital transformation initiatives improving operational efficiency across departments through data-driven decision-making.

SiteLogiQ, Remote (Contract)

- Designed and implemented automated data workflows integrated with Microsoft Office Suite, reducing manual data handling and improving pipeline accuracy.
- Enforced data access controls, permissions, and governance policies aligned with organizational security requirements — directly analogous to Power BI row-level security implementation.
- Collaborated with the PMO to manage milestones, dependencies, and reporting across integrated programs with multiple stakeholders and data streams.
- Maintained detailed documentation of data configurations, workflows, and processes to support governance, auditing, and knowledge transfer.

Born Primitive, Virginia Beach, VA

- Built and maintained KPI scorecards tracking OTIF, service levels, and compliance markers — validating reported figures against source system records.
- Performed data audits to maintain operational accuracy and data integrity across inventory and logistics datasets.
- Created and documented SOPs to standardize data collection and reporting processes.

University of Tennessee, Knoxville, TN

- *Software used: Azure, MS Office Suite, SAP*
- Built data visualizations and presented analytical findings to engineering and technical stakeholders via written reports and in-person presentations.
- Collaborated with engineers to clarify software priorities, data requirements, and end-user expectations.
- Maintained database files and spreadsheets to prevent data loss and ensure long-term data integrity.

Aug 2023 – Feb 2024

Aug 2024 – Nov 2024

Nov 2014 – Dec 2019
