

Alexander Tobin

Web Developer · AI Systems Builder · Automation Specialist

(757) 289-1204 | atobin@alum.utk.edu | Virginia Beach, VA

APPLICATION FOR
Technical Co-Architect
ProSwing Marketing

INTRODUCTION

I'm a self-taught builder who ships real products — custom websites, AI agent integrations, workflow automation pipelines, and connected business systems. I work fast, document what I build, and genuinely enjoy figuring out the right tool for the job — whether that's a visual builder, a no-code automation, or a custom API integration.

TECHNICAL BACKGROUND

Web Development:

Next.js · React · Framer · Webflow · WordPress ·
HTML/CSS/JS · Supabase · Vercel

AI & Chatbots:

Claude API · Azure OpenAI · custom AI agent workflows ·
automated lead-gen pipelines

Workflow Automation:

Zapier · Make.com · Power Automate · Airtable
Automations · API/webhook integrations

Social & Analytics:

Meta Ads · automated posting pipelines · Google Analytics ·
UTM tracking setup

Dev Tooling:

Git/GitHub · CI/CD pipelines · Python scripting ·
PostgreSQL · DigitalOcean

EXPERIENCE HIGHLIGHTS

● Freelance Developer & AI Specialist

Jan 2026 – Present
Building production platforms for real clients — websites,
AI agent workflows, and automation pipelines.

● Operations Manager / Systems Developer

Catalyzt Nutrition · 2024–2026
Led all AI and automation implementation from scratch —
CRM integrations, scheduling pipelines, and operational
dashboards.

● Data Analyst / Project Manager

Ferguson Enterprises · 2022–2024
Built automation workflows, API integrations, and executive
dashboards at enterprise scale.

PORTFOLIO PROJECTS

PrimeLayer Solutions

primelayer.solutions

Full B2B services site — designed, coded in Next.js, deployed to
production.

Kizuna Performance

kizunaperformance.com

Performance coaching site with modern design and live content
management.

CallCatch AI

callcatchai.online

AI-powered call management SaaS — integrated AI workflows and
client-facing dashboard.

WHY THIS FITS

- I build fast and independently — no hand-holding needed.
- I know when to use a visual builder vs. write custom code.
- I've worked directly with business owners to scope and deliver.
- I document what I build so clients can own it afterward.
- I'm genuinely excited by new platforms, APIs, and AI tools.
